

STAREWAY TO HEAVEN

EVENT OBJECTIVE:

Have you ever looked up at the clear night sky and marveled at the infinite maze of the stars? The COEP Astronomy Club is proud to present the 10th edition of Stareway To Heaven –one of the most popular events at MindSpark since its inception. With the event footfall crossing the 1000 mark in the last 2 editions, we are looking forward to another spectacular show this year, spreading the joy of Astronomy among the people. Come and experience the majesty of the night sky in the comfort of a mobile planetarium. Discover the beauty of Astronomy as we guide you through various celestial objects – stars, planets, nebulae, etc. Unravel the magnificent order in this seemingly chaotic universe through the constellation that adorn the sky. Get a glimpse of what knowledge the old civilizations gleaned from a simple look above!! Sit back and let your imagination take a flight as you discover the ancient mythological stories about the constellations.

EVENT STRUCTURE:

The demonstration will be done in batches of people inside the mobile planetarium in the COEP campus.

RULES:

1. Participants are expected to carry a valid ID card and a receipt of registration at all times during the workshop.
2. The participants are requested to check the MindSpark'16 website (www.mind-spark.org) regularly for further updates.

TEAM AND FEE STRUCTURE:
